TOWN OFFICES AND COMMUNITY CENTER

Film Screened from 8:20-9; 37-minute VT film that covers local and global water issues and challenges all of us to make our impact more positive.

WATER QUALITY CHAT SERIES

This “Water Quality Chat” is one of a series of informal, constructive, give-and-take discussions about local waterways in Addison County. These sessions are supported by funds from the Lake Champlain Basin Program and the Vermont Department of Environmental Conservation. Goals of the chats are to share the results of Addison County River Watch’s monitoring work, to bring to light local knowledge, and to explore future actions aimed at improving water quality in Little Otter Creek and Lewis Creek as well as other nearby rivers. Questions? Contact Matt Witten at mwitten@gmavt.net or 434-3236.
